★ ★ ★ ★ ★

With over 80 5-star reviews on Google we're the highest rated data center in Houston.

Hurricane safe

Based on data from the NOAA we can guarantee survival given a worst case scenario, with our building over-prepared by 145% compared to the max wind speed and Critical Load designation from CenterPoint. We maintained 100% uptime throughout Hurricane Beryl.

Clear of flood plains

Purposefully built outside of the 500-year floodplain, and we then still built 3 feet above ground level. The location also means our facility remains accessible during flooding. Less can be said for other Houston data centers.

Conveniently Located

Being located near both the I-45 and I-99 makes our data center highly accessible by any part of Houston, and it's only a short drive to enjoy The Woodlands. That being said, with our Colo+ service you'll technically never have to visit, but you might want to.

The difference matters

Our facility features cutting-edge capabilities such as waterless cooling, indoor generators, and infinite fuel sources to provide the highest level of convenience, reliability and uptime for our clients.

Remote Hands On	Free 24/7, with emergency availability with 15 mins response time
SLA	100% uptime guarantee, with 100% of your month free for portion of services affected by ANY downtime
Power	Four different substations in the area supplying power, owned medium voltage infrastructure with spare parts.
Batteries / UPS	Pure lead batteries deployed in 2(N+1) reliability configuration, achieving published performance for ultra-fast discharge. Multiple redundant and fault tolerant compartmentalized units. We use Toshiba G9000s for category defining efficiency and achieving fault tolerance
Generator Location & Specification	Indoor, significantly more reliable than outdoor. Multiple 1.5 MVA Rolls Royce MTU V18 Twin Turbo Systems with hurricane resistant louver systems.
Fuel Supplies	Independent and isolated fuel reserves lasting 4+ days, and the option for natural gas bi-fuel extending runtime to 12+ days without re-fueling.
Time to Generator	Less than 10 seconds and meets NFPA 110 requirements.
High Performance Computing	Fully modular, compartmentalized cooling enables 50kW cabinets and blade server environments or more.
Cross Connects, Meet Me Rooms & Cabling	Free, forever, always. Dual entries into dual meet me rooms. Milspec armored core fiber cabling with corning high bend radius glass for ultra reliability.
Customizable security	Fully customizable cabinet and suite security for example; motion sensors, man traps and armed security guards.
Compliance	HIPAA, SSAE, SOC, PCI, NFPA 110. Ask us about any compliance you require.
Offices	30+ over-sized offices (11×13 sq. ft) available for rent so you can build your own NOC.
